**Order online at [onedesign.com](http://onedesign.com)**

Promotion Restrictions - Minimum 50% payment required when order is placed. Full payment required one week prior to shipping. Orders not paid in full by assigned ship date are subject to loss of promotion savings. Sails will ship as soon as order can be fulfilled and may be sooner than scheduled ship date on confirmation. Promotion valid for qualifying classes. Offer applies to One Design classes sold and serviced by North Sails One Design Group North America and Europe only. Excludes North's Class Sail Development (CSD) program sails, 3DL, 3Di sails. Contact your North agent for details.

North Sails continues to lead the way in Viper 640 sail development and product features. Our Viper team has focused our product line on creating the fastest sails using the best materials and design features to enhance performance and durability. The North Viper main and jib are constructed using Pentex fabric which, in concert with our radial panel construction, has proven to provide the best durability as well as superior shape holding which equates to **faster, more durable sails**.

### Viper 640 M-7 Mainsail

The Viper 640 M-7 mainsail has been designed to take advantage of a tuning system that emphasizes simplicity while optimizing speed! This shape enables you to chock the mast in light air to induce the proper amount of headstay sag while enabling you to block the mast back and tension the lowers in fresher breezes to straighten the headstay and allow optimal use of vang sheeting.

#### New Features

- ▶ By optimizing the batten positions of the full length battens enable us to maximize the size of the sail at the measured girth points.
- ▶ We have relocated the jib leech window for better viewing of the jib leech telltale for both helmsman and trimmer.

#### Mainsails include

- ▶ Sail numbers, insignia, vision window, jib leech window and sail bag.

### Viper 640 Jib

The North Viper 640 features a full-length top batten which helps the top of the sail twist more effectively which allows more control with the jib sheet and the ability to trim harder! Combine all this with a design that features a fuller entry, flatter leech and a maximum length tapered bottom batten as well as additional panels in the head which assist in adding durability to the sails shape and you have a proven performance leader.

#### New Features

- ▶ We have lowered the jib clew so that the jib lead adjustment is more effective and each change has a distinct effect on enhancing performance.

#### Jibs include

- ▶ Pentex load bearing fabric with radial construction for superior durability, 2:1 clew blocks, luff telltales, leech telltales and sail bag.

### Viper 640 Asymmetrical

The North Viper 640 spinnaker has been designed utilizing the knowledge we have gained on making championship winning sails for a variety of sportboats. Our first project was to maximize the size of our design which, in doing so, makes our sail class maximum size. Our next goal was to create a design that would twist and rotate better so that we could sail lower angles while sailing the same speed or faster. Our Viper 640 spinnaker enables you to do just that. Maximum size, lower and faster. The perfect Viper 640 spinnaker.
